How to add Analytic Solver Platform to Excel

While Analytic Solver Platform (ASP) is already on the designated computers in the lab (H001 & I001 in main lab and A001 & B001 in the grad lab) each student will need to add the add-in to Excel in their student account. They are only able to add in ASP in to excel in the computers mentioned above.

Do not add ASP to any other computer, there are a limited number of licenses available.

Instructions on how to add in ASP are on the programs tab in the tech site, but these instructions will give you a visual to go along with these instructions.

1. Open a blank excel workbook

2. Navigate to File - Options

3. While in Options on the left column click Add-ins

- 6. If successful you should have a new entry. Click OK
- 7. It should load and add a ribbon on the top. It might not happen immediately, so give it a second to load.
